

COMPLETE TURN-KEY TRAINING SOLUTIONS

AEROTEAM Training Solutions offers complete turn-key training solutions, aimed at the aviation industry as a whole. Besides offering a wide range of high quality training courses in many areas of the aviation environment, we are providing a complete solution taking care of competence control, scheduling, consultancy, coordination and execution of the entire training scheme for your organization, leaving your key personnel focussed on their primary tasks.

All training courses can be performed at any of The SA Group facilities, or at the customer's facility if more convenient.

At AEROTEAM Training Solutions training is not just a tickmark to satisfy the authorities. We focus on high quality, interactive classroom training with the student and learning objectives as the sole purpose. We pride ourselves in involving the student, and facilitating an environment where there is space for sharing experiences and having an entertaining learning experience.

On the following pages you can see more information on the training subjects: Competence Control, Customized Training Courses, Operational Training, Technical Training and EASA Part-147 Training.

COMPLETE TURN-KEY TRAINING SOLUTIONS

COMPETENCE CONTROL

Training is what we do at AEROTEAM Training Solutions, and we know how important it is to focus on your core competencies and the tasks where you can create the most value for your organization. A complete turn-key training solution from us will help your organization to focus on the areas where it can create the most value, while being assured that all training requirements are compliant and taken care of. Our Competence Control Software (CCS) provides a complete overview of your entire organization, training due, training schedules, roles, responsibilities and so much more. For a fixed fee per month you will have access to the CCS for your entire staff, and we will take care of all training requirements.

Features of CCS

- Keep track of: roles, training requirements, training schedules and due dates on an individual level.
- Keep track of: AML status, CPL status, ID card expiration, etc.
- Our CCS includes a Learning Management System (LMS) for online training content.
- All training certificates are saved in the system for easy access and overview in audit situations.
- The system is web-based. All employees have access to an app for easy access to their status and upload of course certificates etc.
- A subscription based, all-inclusive training solution, for you to focus on your core business.

CUSTOMIZED TRAINING COURSES

We provide a lot of training courses developed in close collaboration with our customers to cover their specific needs and requirements. Our instructor portfolio is extremely wide with vast experience within basically any part of aviation, enabling us to provide a solution tailored to the specific needs, according to the highest standards.

Examples of Other Training Courses

- Dangerous Goods
- AREA 100 KSA (Knowledge - Skills - Attitude)
- Security Manager Basic Course (NASP 13.1)
- Train the Trainer
- Mental Math for Pilots
- Human Performance and Limitations
- Instructor Assessment Skills
- Certification Specifications (CS23/CS25/CS27/CS29)
